

Austin, TX  
May 14-22, 2016

ICSE 2016 is the premiere worldwide forum for professionals interested in all aspects of software engineering research. Over 1500 academic, industrial, and governmental researchers from dozens of countries—including hundreds of students—attend ICSE.

The three-day main conference has multiple tracks reporting on innovative research results as well as on software engineering education and practice. Tutorials, workshops, and other collocated events are held before and after the main conference to allow in-depth presentations and discussions of specific topics in software engineering.
